ABOUT ME

I am a Computer Engineering student looking for challenging opportunities that will further my professional development. Throughout my academic journey, I have developed skills and knowledge that I can skilfully apply to tackle problems with innovative solutions. My strong desire to learn motivates me to constantly research and explore new frontiers to incorporate fresh ideas and modern practices. I actively seek opportunities that not only enrich my personal development, but also allow me to make a significant contribution to the achievement of objectives.

Object-Oriented Programming with C# Certificate
Platzi Academy - 2023

Entity Framework Fundamentals Certificate
Platzi Academy - 2023

Professional Git and GitHub Course Certificate
Platzi Academy - 2023

Basic Microsoft Excel Certificate
Universidad Estatal a Distancia- 2020

Customer Service Quality Certificate
Universidad Estatal a Distancia- 2020

EXPERIENCE

Assistant at the Socioeconomic Support Office of UNED

I have collaborated in the Socioeconomic Support Office at the Distance State University, where I was responsible for collecting and managing data from public systems, using Excel to store this data. This experience has allowed me to develop skills such as proactivity, responsibility, communication, and data management and manipulation.

Personal Projects

Throughout my career and my training as a Computer Engineer, I have undertaken projects related to web development and software development, including the creation of APIs, graphic interface design, and website construction. These experiences have enabled me to develop and strengthen solid skills in web development, preparing me to confidently tackle technical challenges in this field.

VOLUNTEER WORK

Volunteering at the Cooperative of the Bilingual Experimental High School of Palmares

I contributed to the Cooperative of the Bilingual Experimental High School of Palmares, actively participating in various activities and projects focused on strengthening cooperativism. Through this experience, I have developed a deep understanding of cooperative principles and honed my teamwork and solution design skills for the benefit of both the community and the organization.
